**Friday, October 4 – 2-3 pm**  
PS 216

Dr. Oscar González is a postdoctoral researcher in the Department of Medicine at UC San Diego where he works as a computational neuroscientist. Dr. González received his undergraduate degree in Biology from UC Riverside where his undergraduate research focused on quantum vacuum fluctuations on lipid bilayers. He then received his Ph.D. in Computational Neurosciences from UC San Diego where his research focused on neuronal network dynamics and the transitions from normal healthy brain activity to epileptic seizures. Now as a postdoc, in addition to continuing his work on epileptic seizures, Dr. González is studying the role of sleep in memory consolidation and how properties of sleep can improve current Artificial Intelligence (AI) systems.

Please come out to hear what Dr. González has to say about his career in neuroscience.
