### **ATHLETICS**

SBVC Women's Soccer midfielder Maria Navarro (Ontario H.S.) and defender Basha Greer (Moreno Valley Valley View) have both signed letters of intent, with Navarro heading to Cal Poly Pomona and Greer heading to Humboldt State.

Navarro (far left) was named first team All-Foothill Conference this past fall and was also named to the 2012 first team All-Foothill Conference. Greer (signing) was an integral part of anchoring a defense that put together 12 shut-outs, including four straight from November 1st through the 12th.

Under 10th-year coach Kristin Hauge, SBVC Women's Soccer won their fifth Foothill Conference Championship and made a seventh straight playoff appearance. The team finished with a 17-3-2 overall record, 9-1 in the conference. They were rewarded with a #3 seed in the SoCal Regional Playoffs. ### **SCIENCE UPDATES**

The research done by biology student Alberto Corona last summer at UCR and funded by the U.S. Department of Education Minority Science and Engineering Improvement Program (MSEIP) grant, was selected for the Southern California Conferences for Undergraduate Research. His presentation was entitled *The Search for Active*

### *Transposable Elements in the Aedes aegypti Genome.*

The Science Division has created a new approach to learning communities and students in General Chemistry, sections 1 and 2, are part of this experimental cohort. Counseling, Supplemental Instruction (SI) sessions, class visits by the faculty chair and dean to encourage and motivate, study skill-building sessions, and guest speakers are all components of this learning community. General Chemistry was selected as the focal point for this project since this is a critical course in the pathway to a career in science. For many students this is their first college-level science course and some students get discouraged and drop out of a STEM major. We believe that the support and encouragement will help with retention and success. Additionally, the honors students in these sections are exploring nanotechnology. We have collaborated with the ATTC so the trained faculty member can analyze the students' chemical products on the Atomic Force Microscope.

Additionally, the Science Division is happy to report that more students are taking advantage of Supplemental Instruction (SI) sessions this semester. With increased participation we are hoping for increased success.

Third semester nursing students in the Nursing Program received their first stripe for completing two semesters and being half-way through the program. The fourth semester students "striped" the third semester students during the ceremony.
