Accessing Amazon AppStream
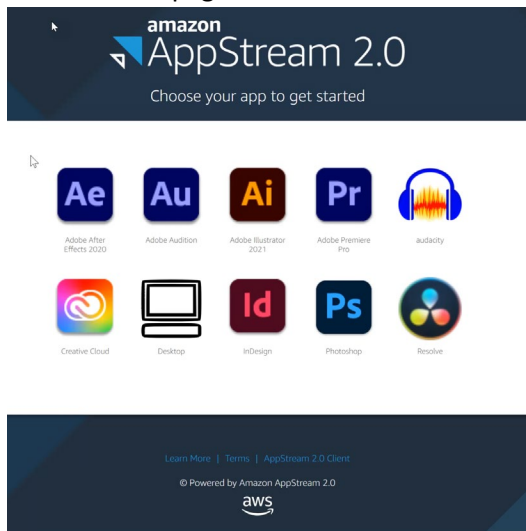

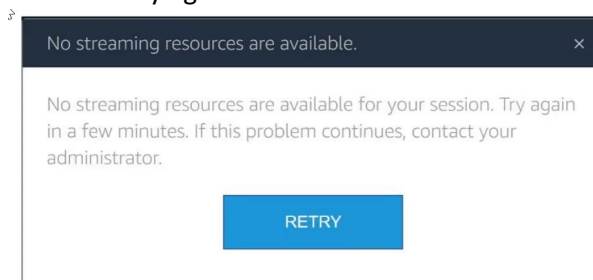

1. Navigate to the Valley College CTS AppStream page using the following link:
   https://www.valleycollege.edu/about-sbvc/offices/campus-technology-services/appstream.php
2. Click on the appropriate link for the AppStream needed for your class.
3. If you are taken to the SBCCD Portal page, login using your full student email and password.
   a. Example: <username>@student.sbccd.edu (j.doe1234@student.sbccd.edu)
4. After logging into the SBCCD Portal, you will be taken to the webpage for the AppStream you selected. The page will look similar to the below:

5. From this page, you can select the app you wish to launch or select Desktop to launch a full desktop environment.
6. You will be taken to a loading page as your AppStream is prepared. Once the AppStream is ready the page will load your selected AppStream.
7. If you receive an error stating that no streaming resources are available, please wait a few minutes and then try again.

8. When finished with the AppStream, close the session by selecting End Session from the drop-down menu in the upper right of the AppStream window.
9. The below video is available for assistance with accessing the AppStream:
