

Full-Time Equivalent Students (FTES)

2012 – 2021

FTES is a way of measuring the size of an institution. FTES is calculated by taking the number of units a student is completing by 15, which is the number of units that a student must take each semester to complete their degree plan within two years. For example, if a student is taking 9 units, the FTES for this student is $9/15=0.6$.
